

## Exercise Design and Development Workshop

Regulation, governance, compliance and reputation are key drivers for organisations investing in risk management. How effective is your investment and does it manage your risks effectively?

By running a well-managed, cost effective training and exercise programme you can ensure staff engagement, internal knowledge, practices and procedures are effective.

Corpress, in association with Sean Coleman of Coleman Risk Consulting invite you to join us at our Dublin workshop. Our view, gained over many years of developing and delivering exercises across the globe, is that **making exercises real** delivers value. We are here to help you get the best out of your investment of time, effort and resources through:

### Exercise Facilitation, Preparation, Control, Observation

#### Exercise Design & Development Course

We are offering a one day course on Exercise Design and Delivery which will focus on Engaging with Risks and **Making Exercises Real**. This course is suitable for anyone who has a responsibility for exercises whether an Emergency, Continuity or Risk professional or who wants to understand how to get the best out of exercises for training and testing.

Course Date: 9 July 2015

Venue: Maldron Hotel Tallaght

Price is € 450 For more information or to book [http://www.corpress.uk/?page\\_id=598](http://www.corpress.uk/?page_id=598)
